Attorney's Docket No.: 12406-095002 / P2002,0863 US E 1

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A device comprising:
a substrate having an active region defined thereon, the active region comprising active components, the active components including patterned ~~conductors~~ electrodes; and
a getter layer located in the active region, the getter layer disposed on the active components, wherein the getter layer ~~comprises~~ consists essentially of an alkaline earth metal, aluminum, tantalum or zirconium and is capable of absorbing water and oxygen.
2. (Original) The device of claim 1 wherein the substrate comprises a flexible substrate for forming a flexible device.
3. (Currently Amended) The device of claim 1 wherein the active components comprise[[s]] organic light emitting diode (OLED) cells, the OLED cells comprising one or more organic layers sandwiched between lower electrodes and the patterned ~~conductors~~ electrodes.
4. (Original) The device of claim 3 wherein the substrate comprises a flexible substrate for forming a flexible device.
5. (Currently Amended) The device of claim 1 further ~~comprises~~ comprising a cap mounted to a bonding region on the substrate to seal the device.
6. (Currently Amended) The device of claim 5 wherein the getter layer covers the patterned ~~conductors~~ electrodes of the active components.

Attorney's Docket No.: 12406-095002 / P2002,0863 US E 1

7. (Original) The device of claim 6 wherein the getter layer comprises barium.
8. (Original) The device of claim 6 wherein the getter layer is formed by flash evaporation.
9. (Currently Amended) The device of claim 6 further ~~comprises~~ comprising a second getter layer lining an inner surface of the cap.
10. (Original) The device of claim 9 wherein the getter layer comprises barium.
11. (Original) The device of claim 9 wherein the getter layer is formed by flash evaporation.
12. (Currently Amended) The device of claim 6 further ~~comprises~~ comprising support posts to support the cap.
13. (Cancelled)
14. (Original) The device of claim 10 wherein the getter layer is formed by flash evaporation.
15. (Currently Amended) The device of claim 5 further ~~comprises~~ comprising a second getter layer lining an inner surface of the cap.
16. (Original) The device of claim 15 wherein the getter layer comprises barium.

Attorney's Docket No.: 12406-095002 / P2002,0863 US E 1

17. (Original) The device of claim 15 wherein the getter layer is formed by flash evaporation.

18. (Original) The device of claim 5 wherein the getter layer comprises barium.

19. (Original) The device of claim 5 wherein the getter layer is formed by flash evaporation.

20. (Currently Amended) An organic electroluminescent device comprising:
a substrate having an active region defined thereon and a bonding region, the active region comprising a plurality of organic light emitting diode (OLED) cells, each OLED cell comprising one or more organic layers sandwiched between upper and lower electrodes, wherein the upper electrodes comprise patterned upper electrodes;
a getter layer located in the active region, the getter layer disposed on the OLED cells, wherein the getter layer ~~comprises~~ consists essentially of one of an alkaline earth metal, aluminum, tantalum or zirconium and is capable of absorbing water and oxygen; and
a cap bonded to the bonding region of the substrate to encapsulate the device.

21. (Previously Presented) The device of claim 20 further comprising a second getter layer lining an inner surface of the cap.

22. (Previously Presented) The device of claim 20 wherein the getter layer is formed by flash evaporation.

23. (Previously Presented) The device of claim 22 wherein the getter layer comprises barium.

Attorney's Docket No.: 12406-095002 / P2002,0863 US E 1

24. (Previously Presented) The device of claim 21 wherein the getter layer is formed by flash evaporation.

25. (Previously Presented) The device of claim 24 wherein at least one of the getter layers comprises barium.

26. (Previously Presented) The device of claim 20, wherein the getter layer consists of an alkaline earth metal.

27. (Previously Presented) The device of claim 1, wherein the getter layer consists of an alkaline earth metal.
